

NETWORK TESTER

IoT sensor

- Quality of network
- Push button
- Visual LED
- Signal quality color scale
- USB rechargeable battery
- Plug & Play

Features

The ACW/TST is a tester that allows you to check the radio coverage and signal reception quality of Sigfox and LoRaWAN networks.

It allows you to optimize and validate the positioning of your IoT sensors in the field.

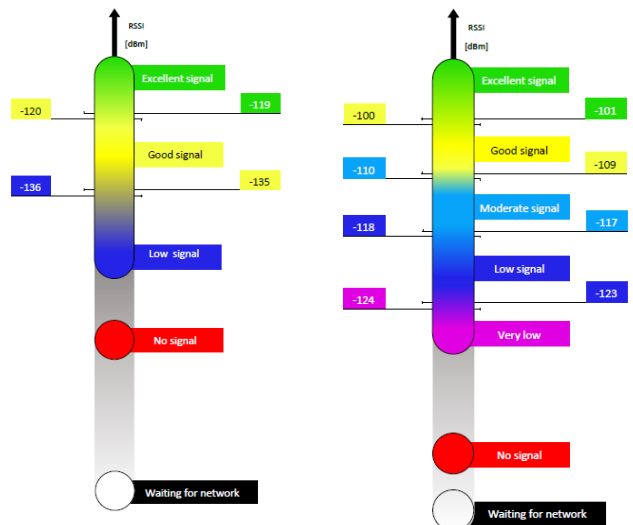

The operation is very simple: a push on a button and a colour code indicates the radio quality.

A registration of the ACW/TST on a public or private IoT network is required to test its quality.

Compatible with computer and mobile versions of the IoT web platform*, the visualization of the network quality is made possible in a few clicks.
