

Requirements

Supported devices

All Saia® PCD PLCs, provided that support S-BUS protocol on the supported communication media; i.e. RS232/RS485 (S-BUS), Ethernet (SOCKET).

Supported Protocol

S-BUS Data Mode

Driver Limits

The maximum number of bytes/bits that can be exchanged with a single task is 128.

Implementation of the communication test

A basic communication test has been implemented for this driver in order to check whether the cables have been connected correctly and main communication parameter have been properly set. For further details see [Test Cable/Comm](#) on general driver manual. For this driver, the communication test has been implemented reading the Register area, at the address 1.
