

# UBIQUITY Security Certificate

## Security Audit 2017

<b>Tested Products:</b>	ASEM S.p.A Access Server, Relay Server, Ubiquity Control Center, Ubiquity Runtime, Ubiquity Router RK11. System version 9.0 beta / validation testing version 9.0
<b>Audit Process:</b>	Modified NIST SP800-115 & OSSTMM.
<b>Concept Audit:</b>	BSI Grundschrift Catalog, IEC 62443.
<b>Component Audit:</b>	Vulnerability assessment, exploitation with standard tools, fuzzing on Ethernet interface, firmware signature evaluation, analysis of communication principle.
<b>System Audit:</b>	Security assessment of end-to-end reference setup.
<b>Test results:</b>	Tests passed, some with recommendations. All recommendations were addressed with system version 9.0 as confirmed by supplementary validation audit. A detailed report has been issued.

Prof. Dr. Peter Fröhlich
